PROFILE

Backend developer building scalable, high-performance server-side systems with **Laravel**, **Spring Boot** and **Express.js**. Designs event-driven architectures, microservices and REST/gRPC APIs powering eCommerce, fintech and on-demand platforms used by thousands of businesses worldwide — with deep ownership of database design, caching, containerized deployment and CI/CD automation.

EXPERIENCE

Backend Developer

[Start Year] – PRESENT

6amTech · Dhaka, Bangladesh

- Build and maintain flagship Laravel platforms for a global customer base — **6Valley** (multi-vendor eCommerce), **eFood** (food delivery), **Demandium** (on-demand services), **6Cash** (MFS digital wallet), **GroFresh**, **Hexacom** and **Menumium** (restaurant management).
- Implemented a high-performance **Swoole** application server for Menumium; containerized workloads with **Docker & Kubernetes**, scaled on DigitalOcean.
- Designed **event-driven architecture** and the company-wide **Payment & SMS Gateway add-on** integrated across the entire product line.
- Own system & database design across MySQL, PostgreSQL, MongoDB and Redis; tuned caching and queries for high-traffic workloads.
- Run CI/CD with **Jenkins**, streaming with **Apache Kafka**, API gateways with Kong, and resilience patterns (circuit breakers).
